TRENDS IN BIOTECHNOLOGY

REFERENCE EDITION

Volume 9

1991

CONTENTS

JANUARY

Workshop
Protein fusions: bioseparation and application,
by R. Sherwood 1

Biotopics
New attempts to solve protein structures lead to MADness,
by Michael J. Geisow 4
The proof of the cloning is in the eating,
by Michael J. Geisow 5

Feature
Progress towards rabies control,
by Morag Ferguson 7

Reviews
Extending the chemistry of enzymes and abzymes,
by Donald Hilvert 11
Towards an understanding of the genetics of bacterial metal resistance,
by Max Mergeay 17
Gene transfer via somatic hybridization in plants,
by Kristina Glimelius, Jan Fahlesson, Maria Landgren, Christina Sjödin and Eva Sundberg 24
Transposons as tools for the isolation of plant genes,
by Lluís Balcells, June Swinburne and George Coupland 31

Book Reviews
Biotechnology: Microbes and the Environment (by Steven C. Witt),
by W. Allan Hamilton 37
Biotechnology of Plant–Microbe Interactions (edited by J. P. Nakas and C. Hagedorn),
by Charles H. Shaw 38

FEBRUARY

Workshop
Catalytic antibodies – something for everyone,
by T. J. R. Harris 39

Undercurrents
Reconstituted viral envelopes – 'Trojan Horses' for drug delivery and gene therapy?
by Robert Blumenthal and Abraham Loyter 41

Biotopics
Do-it-yourself molecules: chaperonin self-assembly,
by Michael J. Geisow 45
The twists and turns of biopolymer migration,
by Michael J. Geisow 46
Back from the future?
by Michael J. Geisow 47

Reviews
Cystic fibrosis – the way forward from the gene,
by Julia R. Dorin and David J. Porteous 48
Exponential amplification of nucleic acids: new diagnostics using DNA polymerases and RNA replicases,
by Paul M. Lizardi and Fred Russell Kramer 53
Repacking protein interiors,
by Warren S. Sandberg and Thomas C. Terwilliger 59
Mycelial morphology and metabolite production,
by Sergei Braun and Susan E. Vecht-Lifshitz 63

Book Reviews
Guide to Protein Purification: Methods in Enzymology Vol. 182 (edited by Murray P. Deutscher),
by Michael J. Geisow 69
Protein Purification – Principles, High Resolution Methods and Applications (edited by Jan-Christer Janson and Lars Ryden),
by Roy Harris 69
Biotechnology: A Laboratory Course (by J. M. Becker, G. A. Caldwell and E. A. Lachgo),
by Kate Graeme-Cook 70

MARCH

Workshop
Intracellular immunization: a new strategy for producing disease-resistant transgenic livestock?
by Peter Staeheli 71
Capturing the light and capturing the market,
by Clare Robinson 72

Biotopics
Public funding of research and development: a broad picture,
by Michael J. Geisow 76
Anti-angiogenesis: towards a molecular tourniquet,
by Michael J. Geisow 78
Nitrogen-fixation in plants: can *Rhizobium* live with non-legume crops?
by John A. Bryant 79

Feature
The competitive market for antiplatelets and thrombolytics: can a new entrant succeed?
by Lisa Y. Shepard 80

Reviews
Redesigning t-PA for improved thrombolytic therapy,
by Jeff H. Robinson and Michael J. Browne 86
Applications of bacterial magnets,
by Tadashi Matsunaga 91
Studying DNA–protein interactions using NMR,
by Irina M. Russu 96

Book Reviews
Enzymes as Targets for Drug Design (edited by M. G. Palfreyman *et al.*),
by Dexter B. Northrop 104
The Bacterial Chromosome (edited by Karl Drilca and Monica Riley),
by Iain S. Hunter 105
Flow Cytometry – A Practical Approach (edited by M. G. Ormerod),
by Tore Lindmo 105
Techniques in HIV Research (edited by Anna Aldovini and Bruce D. Walker),
by A. J. Garrett 106

APRIL

Workshop
Antibodies in plants,
by William F. Swain 107

Undercurrents
Myeloma based expression system for production of large mammalian proteins,
by André Traunecker, Filippo Oliveri and Klaus Karjalainen 109

Biotopics
Binding contracts: antibody engineering,
by Michael J. Geisow 113
From sphygmomanometers to synchrotrons: the progress of protein structure determination,
by Michael J. Geisow 115

Feature
Biotechnology and intellectual property; Part 1: Patenting in biotechnology,
by R. Stephen Crespi 117

Letter
Does co-suppression of sense genes in transgenic plants involve antisense RNA?
by Don Grierson, Rupert G. Fray, Andrew J. Hamilton, Christopher J. S. Smith and Colin F. Watson 122

Reviews
CD4-targeted immune intervention: a strategy for the therapy of AIDS and autoimmune disease,
by Charles Auffray, Dominique Piatier-Tonneau and Guido Kroemer 124
Single chain antibody variable regions,
by Robert E. Bird and Barbara Webb Walker 132
Understanding bacterial biofilms,
by S. A. Blenkinsopp and J. W. Costerton 138

Book Reviews
Optical Microscopy for Biology (edited by Brian Herman and Ken Jacobson),
by Chris Hutchison 143
Enzyme Technology (by M. F. Chaplin and C. Bucke),
by M. J. C. Crabbe 144

MAY

Workshop
Designing the optimal oligo,
by Craig Binnie 145
Tailoring and targeting fibroblast growth factors,
by C. Jane Robinson 147

Biotopics
Life support systems for nanotechnology,
by Michael J. Geisow 148
Stabilizing protein products: coming in from the cold,
by Michael J. Geisow 149

Features
Biotechnology and intellectual property; Part 2: Microorganism deposit questions and agricultural biotechnology issues,
by R. Stephen Crespi 151

Reviews
The prospects for therapy with tumour necrosis factors and their antagonists,
by Alan G. Porter 158
Predicting antigenic sites on proteins,
by Peter S. Stern 163
Human and mouse monoclonal antibodies by repertoire cloning,
by Dennis R. Burton 169

Book Reviews
Genetic Engineering of Crop Plants (edited by G. W. Lycett and D. Grierson),
by John Draper 175
Biofilms (edited by William G. Characklis and Kevin C. Marshall),
by Hans-Curt Flemming 176

JUNE

Workshop
Insect control with transgenic plants: resistance proof?
by Jeroen Van Rie 177

Biotopics
Annexins – forms without function – but not without fun*,
by Michael J. Geisow 180

Letters
More about co-suppression*,
by Jos Mol, Rik van Blokland and Jan Kooter 182

Feature
Biotechnology in Japan – towards the year 2000 . . . and beyond,
by Alfred Scheidegger 183

Reviews
Application of reversibly soluble polymers in bioprocessing,
by Michihiro Fujii and Masayuki Taniguchi 191
Insect control with genetically engineered crops,
by Karen J. Brunke and Ronald L. Meeusen 197
Protein adsorption to solid surfaces,
by Marie Wahlgren and Thomas Arnebrant 201
Conformational features of signal sequences and folding of secretory proteins in yeasts,
by Masakazu Kikuchi and Morio Ikehara 208

Book Reviews
Gene Probes for Bacteria (edited by A. J. L. Macario and E. Conway de Macario),
by Gordon Dougan 212
Gene Cloning, 2nd edn (by T. A. Brown),
by Peter Sudbery 212
Molecular Cloning: A Laboratory Manual, 2nd edn (by J. Sambrook, E. F. Fritsch and T. Maniatis),
by Graeme A. Reid 213
Postimplantation Mammalian Embryos – A Practical Approach (edited by A. J. Copp and D. L. Cockroft),
by Ian Wilmut 214
DNA Fingerprinting – an Introduction (by Lorne T. Kirby),
by Karen M. Sullivan 215

* **see Errata**

JULY

Editorial
The new *TIBTECH*: From research to application – the science behind the business,
by Clare Robinson 217

Biotopics
The evolution of the word 'Biotechnology',
by Max J. Kennedy 218
The coming of age of glycobiology,
by Michael J. Geisow 221

Focus
Multienzyme systems obtained by gene fusion,
by Leif Bülow and Klaus Mosbach 226

Reviews
Towards third-generation whooping cough vaccines,
by Rino Rappuoli, Mariagrazia Pizza, Audino Podda, Maria Teresa De Magistris and Luciano Nencioni 232
Common principles in protein folding and antigen presentation,
by Shan Lu, Victor E. Reyes, Rochelle R. Torgerson, Robert E. Lew and Robert E. Humphreys 238
High performance capillary electrophoresis,
by John Frenz and William S. Hancock 243
Analysing lymphokine–receptor interactions of IL-1 and IL-2 by recombinant-DNA technology,
by Gerard Zurawski 250

Book Reviews
Beyond Mendel's Garden: Biotechnology in the Service of World Agriculture (by Gabrielle J. Persley),
by Winston J. Brill 257
Handling Laboratory Microorganisms (by Charles Penn),
by Ken P. Flint 258

AUGUST

Biotopics
Stabilizing proteins . . . with hybrid vigour,
by Michael J. Geisow 259
Biosensors – a swell response to sugar,
by Michael J. Geisow 260

Forum
Workshop
Biological pulping in paper manufacture,
by Ian D. Reid 262

Letters
Stabilizing protein products: reflections on the glassy state,
by Tony Auffret 265
Beyond antisense – How do transgenes interact with homologous plant genes?
by Richard Jorgensen 266

Focus
pH gradients and membrane transport in liposomal systems,
by P. R. Cullis, M. B. Bally, T. D. Madden, L. D. Mayer and M. J. Hope 268

Reviews
The kinetics of plasmid loss,
by David K. Summers 273
Strategies for improving plasmid stability in genetically modified bacteria in bioreactors,
by P. K. R. Kumar, H-E. Maschke, K. Friehs and K. Schügerl 279
The nasal delivery of peptides and proteins,
by Lisbeth Illum 284

Book Reviews
The Molecular and Cellular Biology of the Potato (edited by M. A. Vayda and W. D. Park),
by Wayne Powell 290
Genes and Cancer (edited by Desmond Carney and Karol Sikora),
by Herman van der Putten 291
Anaerobic Bacteria (by Paul N. Levitt),
by Brian Watt 292

SEPTEMBER

Biotopics
The importance of being a protein scientist,
by Michael J. Geisow 293
Peptide synthesis – theme and variations,
by Michael J. Geisow 294

Forum
Meeting reports
Targeting peptides and proteins: NATO ASI,
by Alexander T. Florence and Gregory Gregoriadis 295
Biotechnology and sustainable development in the Third World,
by Frits K. de Graaf 297

Workshop
Protein sequences – homologies and motifs,
by Michael J. E. Sternberg and Suhail A. Islam 300

Focus
Retroelement particles as purification, presentation and targeting vehicles,
by A. J. Kingsman, S. E. Adams, N. R. Burns and S. M. Kingsman 303

Reviews
Environmental regulation of bacterial virulence – implications for vaccine design and production,
by Elwyn Griffiths 309
Media additives for protecting freely suspended animal cells against agitation and aeration damage,
by Eleftherios T. Papoutsakis 316
Molecular biology of *Erwinia*: from soft-rot to antileukaemics,
by Janine Robert-Baudouy 325

Book Reviews Supplement
The Terminology of Biotechnology: a Multidisciplinary Problem (edited by K. L. Loening),
by Max J. Kennedy 330
Planar Chromatography in the Life Sciences: Chemical Analysis Monographs Vol. 108 (edited by Joseph C. Touchstone),
by I. D. Wilson 331
Fundamentals of Protein Biotechnology (edited by Stanley Stein),
by Michael J. Geisow 331
In Vitro Methods for Conservation of Plant Genetic Resources (edited by John H. Dodds),
by Michael F. Fay 332
Advances in Human Genetics (edited by H. Harris and K. Hirschhorn),
by N. K. Spurr 333
Living Resources for Biotechnology – Animal Cells (edited by A. Doyle, R. Hay and B. E. Kirsop),
by Caroline MacDonald 333
Agricultural Biotechnology: Opportunities for International Development (edited by Gabrielle J. Persley),
by Vaughan A. Hilder 334
Chromosome Banding (by A. T. Sumner),
by Michael G. Daker 335

OCTOBER

Biotopics
DNA-based drugs, diagnostics and devices,
by Michael J. Geisow 337
Biotechnology – what does industry want from the science base?
by Michael J. Geisow 338

Forum
Workshop
Detection of nucleic acid hybridization using surface plasmon resonance,
by Terek Schwarz, Debra Yeung, Edward Hawkins, Paul Heaney and Alex McDougall 339

Meeting report
Oligonucleotides: problems and frontiers of practical applications,
by C. Hélène and T. Le Doan 341

Focus
Cofactor engineering,
by Johannis A. Duine 343

Reviews
The role of *N*-linked oligosaccharides in glycoprotein function,
by Alan D. Elbein 346
Developing rDNA products for treatment of hemophilia A*,
by Randal J. Kaufman 353
The future impact of industrial lipases,
by Fredrik Björkling, Sven Erik Godtfredsen and Ole Kirk 360

Book Reviews
Methods in Yeast Genetics: A Laboratory Course Manual (by Mark D. Rose, Fred Winston and Philip Heiter),
by Derek J. Jamieson 364
Large-Scale Mammalian Cell Culture Technology (edited by A. S. Lubiniecki),
by A. Handa-Corrigan 364
Genetically Engineered Organisms: Benefits and Risks (by J. R. S. Fincham and J. R. Ravetz),
by Roger W. Pickup 365
Modern Thin-Layer Chromatography (edited by Nelu Grinberg),
by R. J. Ruane 366
Books received 366

***see Errata**

NOVEMBER

Biotopics
Biotechnology transfer: should administrations stimulate or steer?
by Michael J. Geisow 367
Both bane and blessing – inclusion bodies,
by Michael J. Geisow 368

Forum
Workshop
Undercooling – low temperature without freezing,
by Sheila F. Mathias 370

Meeting report
Frontiers of biotechnology in agriculture,
by Arie Altman 373

Focus
Bispecific antibodies for targeted cellular cytotoxicity,
by Michael W. Fanger and Paul M. Guyre 375

Reviews
The molecular basis of partitioning in aqueous two-phase systems,
by Jonathan Huddleston, Andres Veide, Kristina Köhler, Julia Flanagan, Sven-Olof Enfors and Andrew Lyddiatt 381
Malaria vaccines – progress and problems,
by Francis E. G. Cox 389
Tailoring the microenvironment of enzymes in water-poor systems,
by Bo Mattiasson and Patrick Adlercreutz 394

Book Reviews
Biotechnology in Agriculture and Forestry, Vol. 10, Legumes and Oilseed Crops I (edited by Y. P. S. Bajaj),
by Paul Gepts 399
In Situ Hybridization: Principles and Practice (edited by J. M. Polak and J. O'D. McGee),
by John R. Gosden 399
Process Measurement and Control, Vol. 1: On-line Estimation and Adaptive Control of Bioreactors (by G. Bastin and D. Dochain),
by Glyn Hobbs 400
Microbial Enzymes and Biotechnology; 2nd edn (edited by William M. Fogarty and Catherine T. Kelly),
by Geoffrey Hazlewood 401

DECEMBER

Biotopics

Unravelling the mysteries of molecular audit: MHC Class I restriction,
by Michael J. Geisow 403

Of mice and mimics,
by Michael J. Geisow 404

Forum

Meeting reports

A productive mix of cultures,
by C. J. Mannix 406

Cell-based assays – technology providing alternatives to animal testing,
by C. Jane Robinson 407

Focus

Lichen-forming fungi: potential sources of novel metabolites,
by Peter D. Crittenden and Neil Porter 409

Poliovirus antigen chimeras,
by Charlotte S. P. Rose and David J. Evans 415

Reviews

Understanding and controlling detrimental bioreactor biofilms,
by James D. Bryers 422

Fluid-mechanical damage of animal cells in bioreactors,
by Eleftherios T. Papoutsakis 427

Book Reviews Supplement

Molecular Systematics (edited by David M. Hillis and Craig Moritz),
by Gabby A. Dover 438

Japanese Biotechnology – A Comprehensive Study of Government Policy, R&D and Industry (by Robert T. Yuan and Mark D. Dibner),
by Carl S. Jone 439

Biotechnology in Japan Yearbook 1990/91: Markets and Research/Development (edited and co-published by Nikkei Biotechnology and Japan Pacific Associates),
by Mark D. Dibner 440

Animal Virus Pathogenesis – A Practical Approach (edited by Michael B. A. Oldstone),
by Anthony Nash 441

Advances in Microbial Physiology: Vol. 31 (edited by A. H. Rose and D. W. Tempest),
by J. Gareth Morris 441

Physiology of the Bacterial Cell: A Molecular Approach (by F. C. Neidhart, J. L. Ingraham and M. Schaechter),
by Elwyn Griffiths 442

Bioinstrumentation – Research, Developments and Applications (edited by Donald L. Wise),
by P. R. Coulet 443

Understanding Enzymes, 3rd edn (by Trevor Palmer),
by Bernard Henrissat 444

Protein Engineering in Focus (by Peter C. E. Moody and Anthony J. Wilkinson),
by Kenji Takabayashi 444

Methods in Plant Biochemistry, Vol. 6; Assays for Bioactivity (edited by K. Hostettmann),
by R. R. M. Paterson 445

Plant Biotechnology Series: Vol. I, Plant Genetic Engineering; and Vol. II, Developmental Regulation of Plant Gene Expression (both edited by Don Grierson),
by John Bryant 446

Safer Insecticides – Development and Use (edited by Ernest Hodgson and Ronald J. Kuhr),
by William J. Moar 446

Books received 447

Errata

Annexins – forms without function – but not without fun,
by Michael J. Geisow, pp. 180–181 260

More about co-suppression,
by Jos Mol, Rik van Blokland and Jan Kooter, pp. 182–183 242

Developing rDNA products for treatment of hemophilia A,
by Randal J. Kaufman, pp. 353–359 421

Author Index 449

Subject Index 452

Index of Books Reviewed 461
